AND ENVIRONMENTAL MONITORING

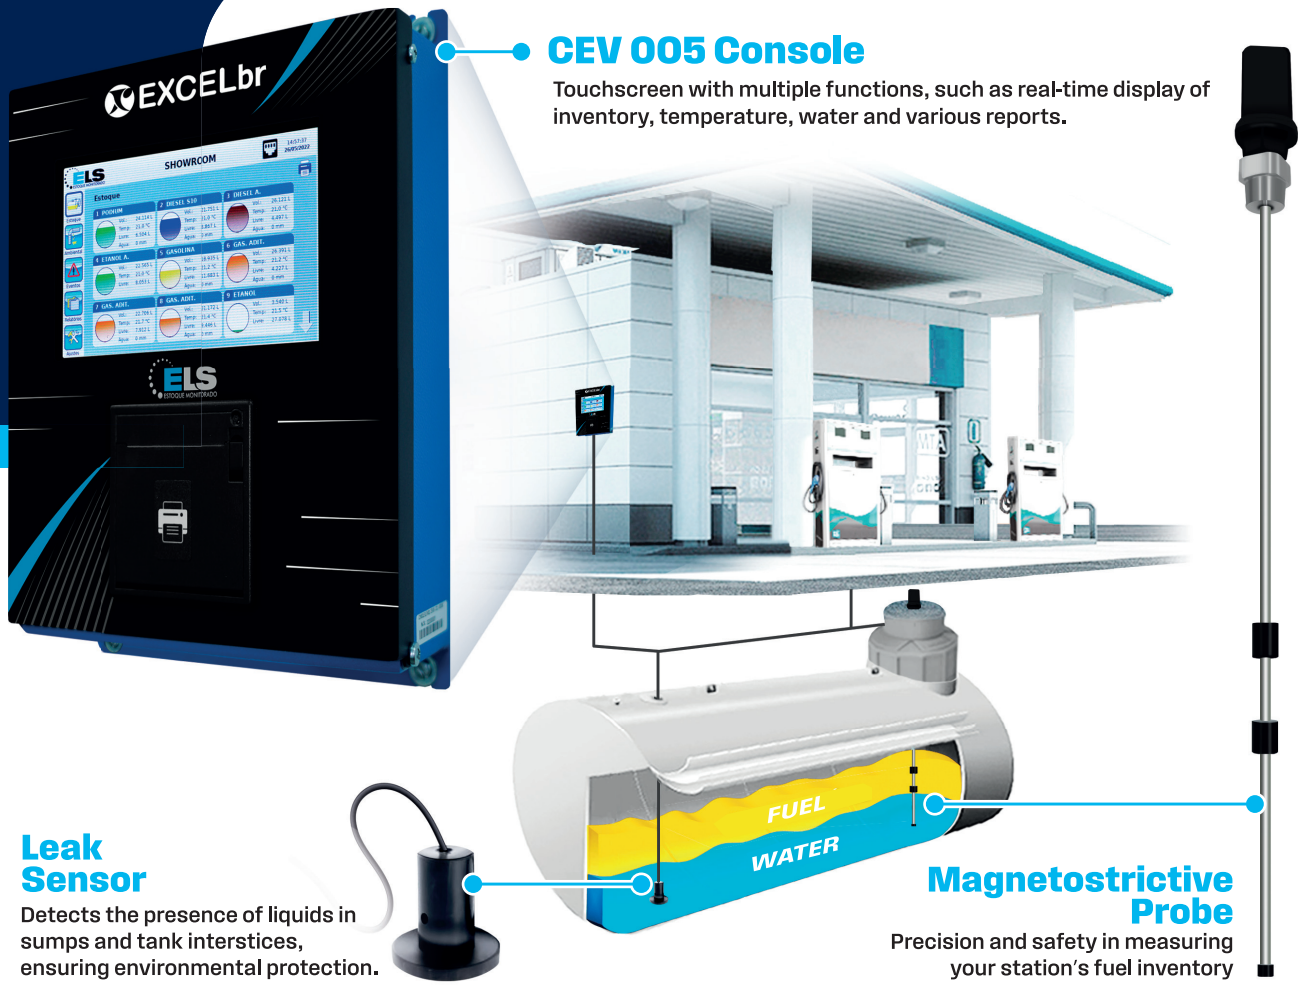

Excel
FUELING TECHNOLOGIES

ELS Line

TANK MEASUREMENT & MONITORING

Advanced technology that provides the best precision in fuel measurement and the safety required to prevent environmental contamination, delivering real-time information on fuel inventory, delivery notifications, leak detection alerts, reports and much more.

CEV 005 Console

Touchscreen with multiple functions, such as real-time display of inventory, temperature, water and various reports.

Leak Sensor

Detects the presence of liquids in sumps and tank interstices, ensuring environmental protection.

Magnetostrictive Probe

Precision and safety in measuring your station's fuel inventory

- Simple and fast access to **fuel inventory**
- Manage your fuel stations in **one place**
- Online access via **computers** and **mobile phones**
- **Measures** fuel level, water and temperature

Anywhere, **anytime** and with **any device**

The ELS System provides **real-time access** to your fuel inventory and movements through the Web Platform or Mobile App, for both computers and mobile phones.

Data stored in the cloud

Exports data via XML or MODBUS TCP/IP

Communicates and integrates with ERP systems

» ADDITIONAL FEATURES

- **Automatic** tank calibration
- **Connects** up to **12 probes** and **16 leak sensors** (expansion board option for more tanks)
- **Optional relay output** for submersible pump control
- **Notifications** for fuel inventory, deliveries and leaks
- **Various** reports

Smart solutions and high-quality products since 1990. Pioneer of the **world's first digital tire gauge**, reaching several markets and becoming the **largest company in the segment.**

Check our website for products and solutions **for your business.**
